INTRODUCTION

This report contains the results gathered during the online course-instructor evaluations. Students were invited to share their feedback on the teaching and the course material, ultimately to help improve the overall quality of education at our institution.

It is now our collective duty to turn this insight into action.

As part of this mission, all instructors receive an Individual Report for developmental purposes i.e. to identify strengths and areas for improvement in regard to their teaching methods. Contents include graphs, tables, rankings, frequencies, statistics, and comments, as well as reflective questions to help guide you in the preparation of your personal development plan.

We urge every Faculty Member to diligently examine all the analysis, to seek to understand it, to take note of patterns, to draw logical conclusions and to take it upon yourself to act on the valuable feedback your students have taken the time to provide.

What did you like the most about the course?

Comments
The professor made the course so easy and fun.Hes one of the best
Everything about the course was amazing. The teaching methods and how the instructor delivers the ideas are on point. Class is fun and allows you to gain very good knowledge because the instructor teaches in such a way that proves where the theorems have been derived from, which makes classes enjoyable and the outcome at the end of the day is positive in terms of understanding concepts.
The professor knew as much as we did that a math course's exams cannot be conducted with MCQ's and always provided us with written exams. The professor also provided many tricks and interesting ways of solving questions and made the course very enjoyable.
the professors way of teaching
My experience in the course has stimulated my interest in the subject.
I understood everything in this course and was definitely was a better experience than calculus 2. The prof was very understanding and helped us understand everything. Also, the way the professor taught us was very nice and was very patient with us.

Suggest specific improvements to the course, if any.

Comments
none.
all great
The idea of written exam maybe but I do like it. Sending our files can make us late in submitting if we had bad wifi connection.
no improvements
