△ Min ◇ Max ┆ StandardDev

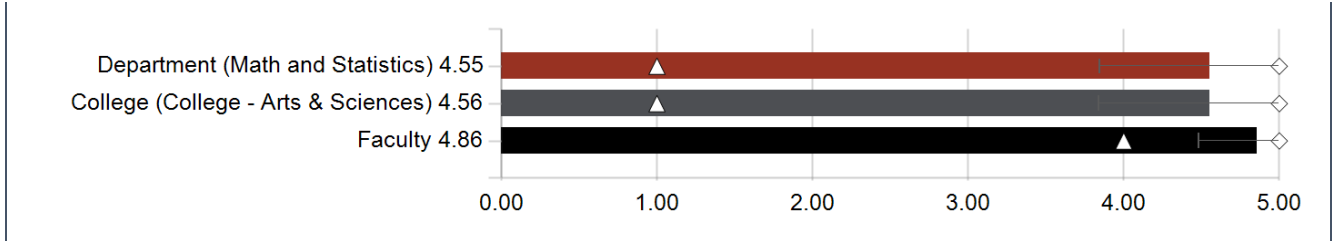

Overall

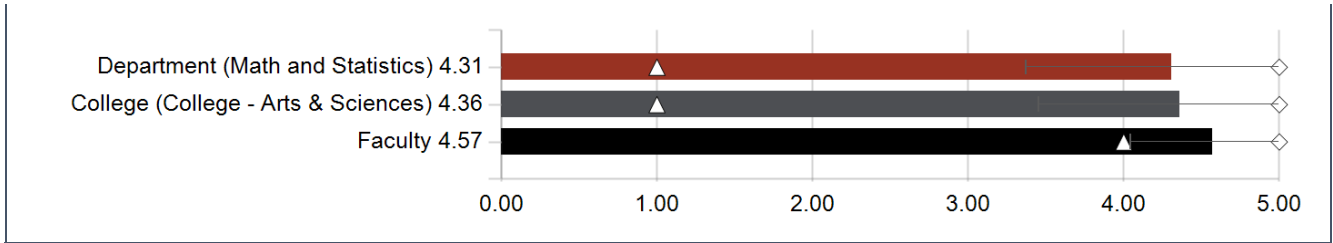

1. The course assessment and grading criteria were clearly defined.

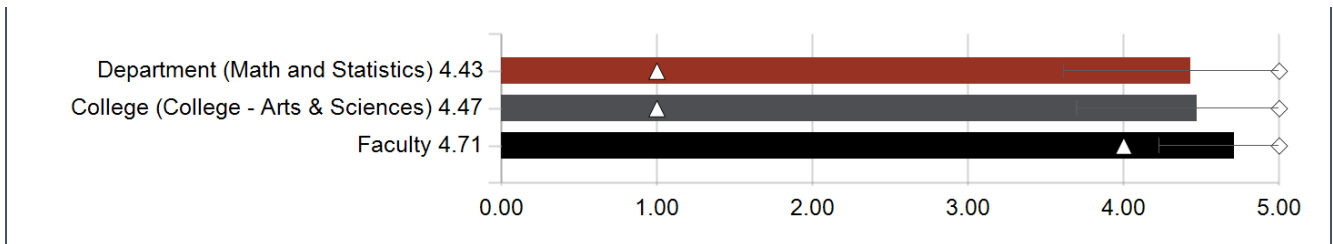

2. The course content, as described in the syllabus, was fully covered.

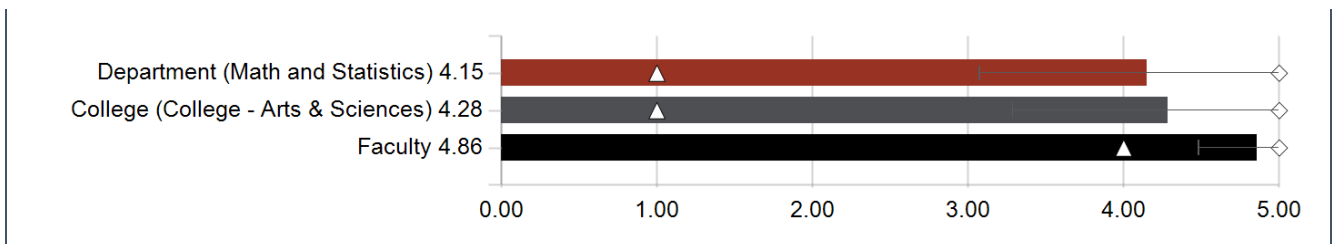

3. The course material (textbook(s) and supplemented material) were appropriate.

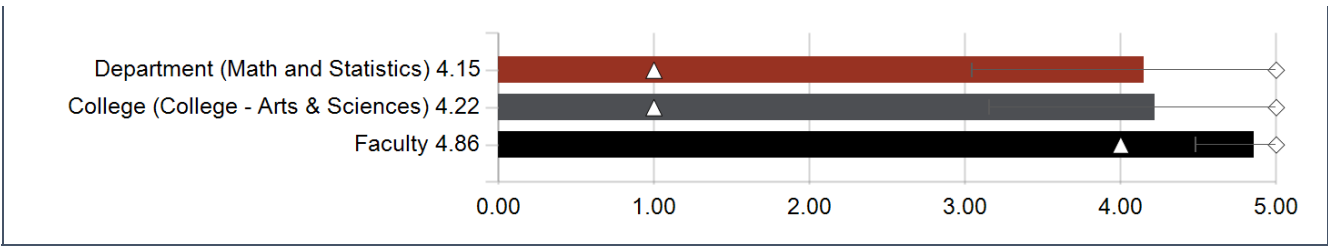

4. The course learning outcomes, as stated in the syllabus, were achieved.

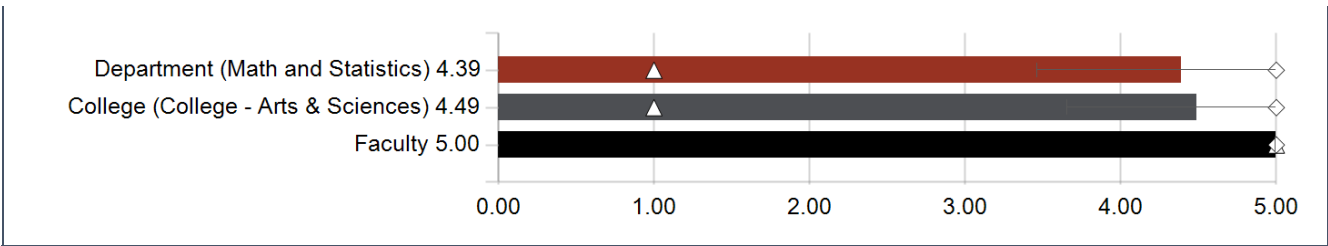

5. The classroom discussion/interaction helped me understand the course material.

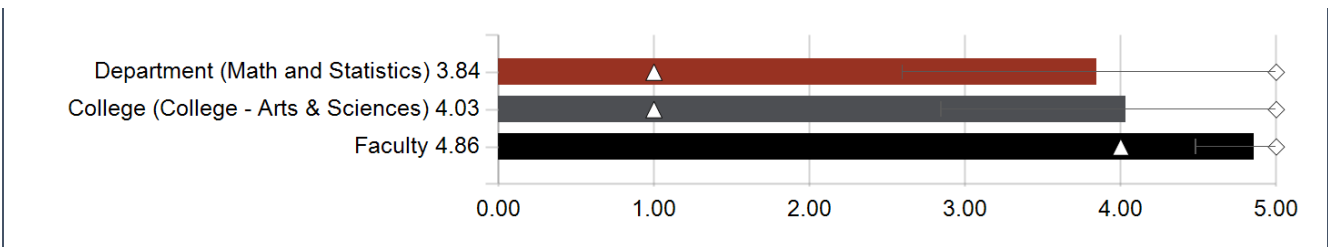

6. The teaching method(s) (i.e., way(s) of teaching) used in this class helped me learn the course content.

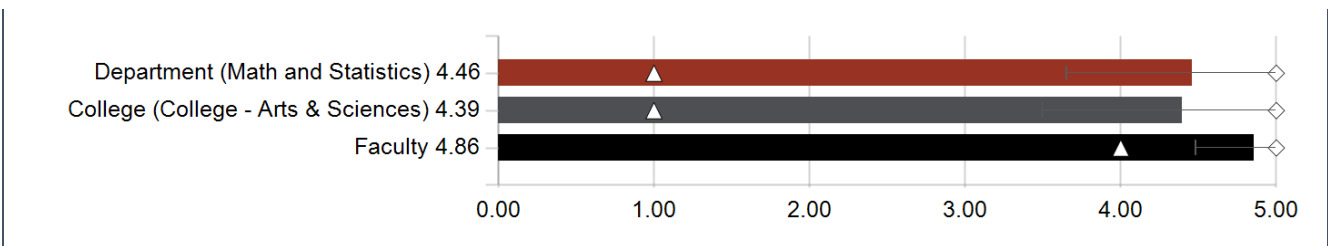

7. Students' questions relevant to class discussion/lecture were encouraged and welcomed.

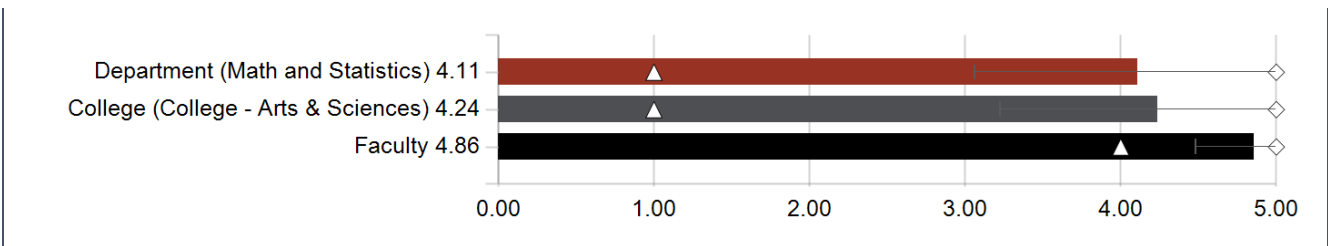

8. My experience in the course has stimulated my interest in the subject.

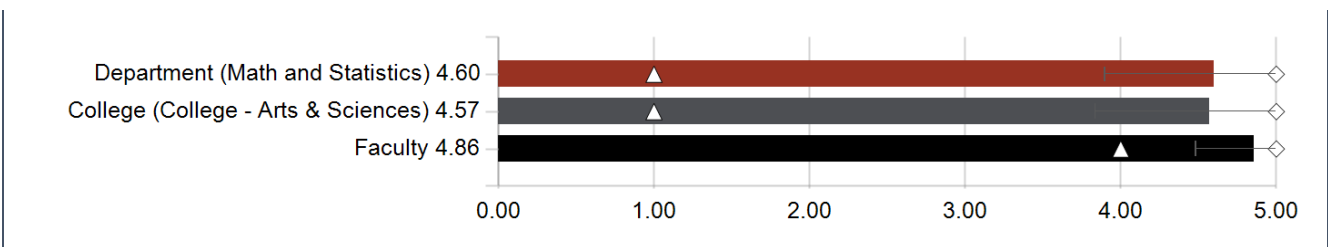

9. My work in the course was evaluated within the timeframe the instructor said it would be evaluated.

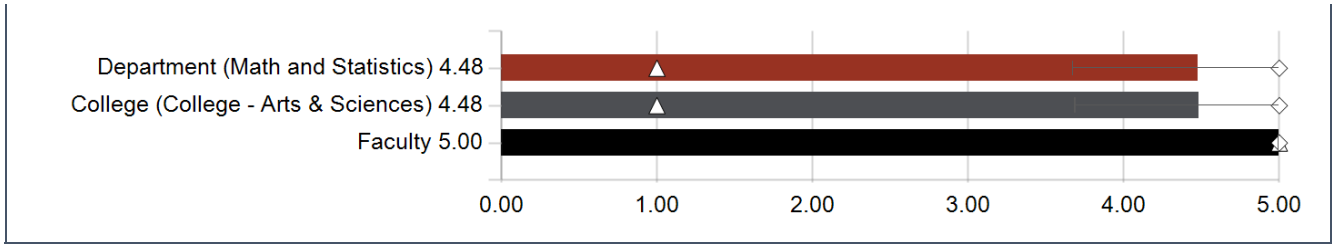

10. The instructor provided helpful feedback on my work.

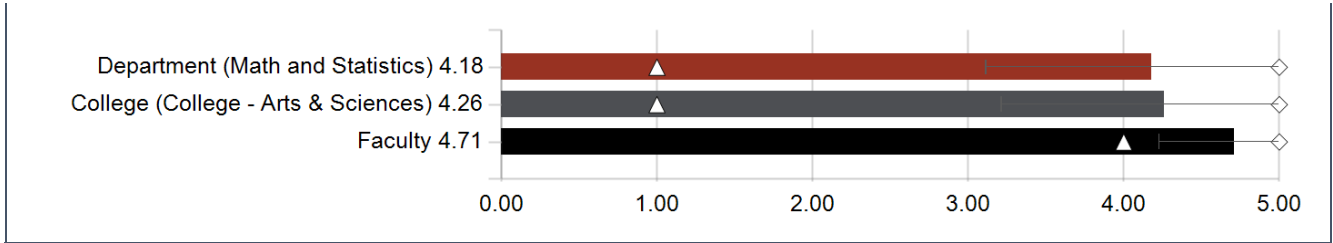

11. The instructor started and finished the class on time.

12. The Instructor was accessible during the office hours stated in the syllabus.

13. Overall, my learning experience in this course was positive.

### What did you like the most about the course?

#### Comments

The concepts were very interesting, and the professor always related the concepts taught to applications in the real world which made the material more understandable. The professor was also very fun to learn from, extremely jolly individual. One of the best professors in the math department. He is very knowledgeable about the discipline, and always shares snippets of his knowledge during class, which I appreciated. He taught graph theory in a very clear and simple way, which made the course very effective :).

It really taught important concepts that could be used by both math majors, and Computer Science/Engineering majors. The professor taught the course really well and his homework enforced the learning style positively.

I came into this course thinking that I would hate it, but Prof Ayman proved me wrong. I absolutely enjoyed this course and I loved the way it was taught. I learned so much from it and I am sure it will benefit me in my Computer Science studies. Also, the way Prof. Ayman taught made it really easy to take notes, and it helped me a lot in my exams.

That it is easy to grasp concepts, but the interpretation of the concept can be mapped to very interesting problems and fields

NA

None!! Prof Ayman, you are AMAZING!! :)

Provide a little more detail into algorithms on graphs. Moreover, provide a larger basis for theory and proofs
