-	Professor Ayman Badawi is a legend. Although he hates people asking him questions and he made fun of me a couple of times when i asked questions in class, he is my favorite. I think he is right and his explanation is MORE than enough and we shouldn't ask questions after his explanation. He is amazing and he knows what he is talking about unlike other math professors who keep going back to their notes to teach us. THE BEST MATH PROF HONESTLY.

Q21 - Please provide your instructor with helpful suggestions for improving his/her effectiveness

Faculty: **Badawi, Ayman R**

Response Rate: **16.67%** (5 of 30)

-	Please do not make the midterms and exams as multiple choice questions	
-	.	
-	Having exams as multiple choices is okay, but, please, make the exams' distribution more logical (one wrong answer throws a student from from an A to a B). And respect the students more, DO NOT humiliate them in front of the class if they failed to realize something, or have a weak background in math!	
-	The instructor should be more polite as I found him quite mean and rude to the students, who might ask amateur and insignificant yet genuine questions. He should be more attentive to all the students equally rather than a few selected students, who might be easily grasping the content in class compared to others.	
-	The fact that the instructor changed the questioning pattern to Multiple Choice Questions (for the first midterm, as the second is not over yet), was a bit unfair, as consequently there are no partial grades, and in Math courses partial grades can make a huge difference. The instructor could be a little more organized and clear with his objectives for the day or the week.
