1 more organised
2 Just to use numbers instead of letters

Q21 - Please provide your instructor with helpful suggestions for improving his/her effectiveness

1 You are just amazing. But one single thing, you get mad really fast and that used to prevent me from asking questions if I were ever confused.
2 Please don't be so rude to us. It is very discouraging to us. We understand that it may be difficult for you to see some of the mistakes that we make, but your ranting in class only serves to negatively affect our work by discouraging us from attempting your subject for fear of harsh criticism in the event of failure. You are a wonderful instructor, but I would suggest you try and tone it down when dealing with your students. We are afraid of even asking you questions because you might humiliate us in class.

Q22 - Please enter specific comments, if relevant, on the role that Information Technology plays or could play in this course

1	overall great teaching method	
2	<p>What an amazing professor!</p> <p>It is trivial that such course needs a lot of imagination and understanding. Its enough to sit in the class and just stare on what is being explained by the professor. We imagine various questions and concepts at the same time. Also, the major key to success this course with such professor is by using our imagination. The rest of the material will easily become trivial just by staring!</p>	
3	<p>This is my second time that I am taking this course and by taking it with Dr Ayman, he has transformed one of my most hated subjects to one of my most favourites. Dr Ayman's wonderful ability to make analogies makes this course; which before looked quite abstract to a course as easy as high school math. Moreover him simplifying terms such as dimension and null to simpler terms for students to better grasp the concept is phenomenal. He also continues to improve the syllabus to more logically fit in with the flow of learning of concepts.</p> <p>Big Result: Dr Ayman's method of teaching is one of the best I have ever come across. I wish he taught every math course in the university in every semester so that more people can benefit from his teaching.</p>	
4	The professor is very knowledgeable and needs only to change the way he runs his interaction with his students.
